

CURVED STAIRS

C5

Features

- easy to use joystick operation
- smooth start/stop action
- lockable isolation switch
- fold-up seat & footrest
- whisper-quiet operation designed for simple installation
- swivel seat
- infra-red remote controls
- suitable for indoor or outdoor applications
- electronic and mechanical braking systems
- safety cut-out sensors

Benefits

- suitable for curved and variable inclination stairs
- non computer controlled levelling mean that breakdowns to the levelling system is unlikely

Reminders

- purchasers need to allow for a longer delivery program for this product due to the custom rail
- stairs that are spiral or curved may be problematic and measuring is a precise and skilled task

Compliance

- AS 1735.7
Australian Standard
for Stairway Lifts

The C5 is usually chosen by people in private homes who are struggling with the stairs and have some degree of mobility.

The C5 is suitable for indoors or outdoors and only takes up a small space.

We supply and install individual configurations for individual solutions.

The C5 is suitable for gradients up to 75 degrees steep and can be mounted on the inside or outside of the curve.... or both.

Finished in the powder coat colour of your choice with a select range of fabrics, the lift blends easily into your property.
